

Do you own beef cattle or sheep...?

...purchase or agist livestock, have neighbours with livestock,
or sell through a quality assurance program?

(e.g. GAP, Cape Grim Never Ever, JBS Farm Assurance)

...then this one-day workshop is for you!

Learn how on-farm biosecurity can assist with the **management of pests, diseases, weeds, contaminants, and residues** and go home with a draft of a **practical biosecurity plan specific to your operation** – that satisfies assurance program requirements, and can be followed by all (e.g. farm visitors and staff).

“...having a structure to work through would have been helpful in the earlier days [before we had disease incursions]” Shelly Saunders, sheep producer and past workshop participant.

When and where:

9:30am – 4pm

Monday 5 September, Campbell Town Hall, 75-77 High St

Tuesday 6 September, Winnaleah Football Clubrooms, 63 Main St

Thursday 8 September, Smithton Wyndarra Centre, 43 Smith St

Tuesday 13 September, Flinders Island Arts & Entertainment Centre, Rose Garden Room

Cost: \$55 (inc. GST) per business

(food and materials – including a biosecurity farm gate sign worth \$40 – are included)

Who should attend: farm owners, managers, and staff

Registrations close 3 days before each event.
