

# Maximising Lucerne productivity

Lucerne is a highly nutritious and productive pasture species and a great choice for finishing livestock, especially in the drier areas of the state. However, it often doesn't live up to its potential, mainly due to a lack of knowledge. This workshop covers a range of practical management information to enable producers to maximise the benefits of Lucerne in their production systems.

## What?

Presentations and discussions on:

- Lucerne plant physiology
- Animal health considerations
- Grazing management and feed budgeting
- Agronomy (weed management, plant nutrition and irrigation scheduling)

## Presented by:

- Jason Lynch (Macquarie Franklin)
- Kelly Burke (PGG Wrightson Seeds Product Development Manager -South)
- Dr Bruce Jackson (DPIPWE senior veterinary officer)

## Where & when?

**Hamilton Resource Centre**  
Lyell Highway **Hamilton**  
**Tuesday 6 September 2016**  
9am to 1pm followed by a light lunch

**Riverlands**  
159 Wellington St, **Longford**  
**Wednesday 7 September 2016**  
9am to 1pm followed by a light lunch
